

About SeniORGarden

The SeniORGarden project aims to encourage older people to remain socially and physically active through the creation of organic gardens using ecological practices and smart technologies.

By involving several generations, it encourages the sharing of skills and knowledge, while contributing to the well-being of participants and the preservation of the environment.

Project Outcomes

Aiming to encourage senior people to remain physically and socially active, SeniORGarden has created an interactive training on organic gardening. Split in four pillars, it includes 1. awareness raising on organic gardening and the EU's Green Deal, 2. training on organic gardening practices, 3. knowledge enhancement on how to use smart gardening apps for maintaining home gardens and 4. a practical guide for enhancing the digital skills of seniors through their smart phones.

The EU Green Deal & SeniORGarden

How do you think the European Green Deal and SeniORGarden are connected?

Smart Gardening Apps

ICT Tools for Seniors

Organic Gardening Practices

Crop Rotation

Vertical Gardening

Native Plant Gardening

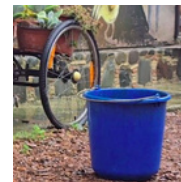

Composting

Seed Starting in Pots

Mulching

Rainwater Harvesting
